Synergy Network Address Formatting Specification

Category	Prefix	Example Address	Use Case / Description	Notes
Wallet Address	**synw**	***synw****xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx*	Primary wallet prefix used for standard user accounts.	41-character Bech32m address derived from Dilithium-3 keypair. Integrates with UMA mapping.
	syns	***syns****xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx*	Secondary wallet prefix for utility or exchange wallets.	Common for custodial or automated accounts.
	syna	***syna****xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx*	Reassigned prefix for wallet addresses ("A" = Account).	Formerly transaction prefix; now standard wallet identifier.
	synz	***synz****xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx*	Alternate wallet prefix for UMA-linked smart wallets.	Often used for imported accounts or specialized multi-chain identities.
Transaction Identifiers	**syntxn**	***syntxn****xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx*	Standard on-chain transaction on PoSy core layer.	Used for intra-chain transfers, staking, governance votes, etc.
	synxxn	***synxxn****xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx*	SXCP cross-chain transaction identifier.	Executed via Synergy Cross-Chain Protocol (MPC relayers & threshold signatures).
	synixn	***synixn****xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx*	Reserved transaction prefix for internal infrastructure events.	Future use for validator↔relayer sync or system state updates.
Fungible Tokens (STS-9 Standard)	**synb1**	***synb1****xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx*	STS-9: Fungible Token Standard	
	synb2	***synb2****xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx*	STS-9: Fungible Token Standard	
	synb3	***synb3****xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx*	STS-9: Fungible Token Standard	
Non-Fungible Tokens (STS-NF Standard)	**synn1**	***synn1****xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx*	STS-NF: Non-fungible Tokens Standard	
	synn2	***synn2****xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx*	STS-NF: Non-fungible Tokens Standard	
Multi-Asset Token (STS-MA Standard)	**synj**	***synj****xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx*	STS-MA: Multi-Asset Standard	
Identity & Credential Token (STS-ID Standard)	**synk**	***synk****xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx*	STS-ID: Identity & Credential Standard	
Smart Contracts	**synq**	***synq****-contract-xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx*	System-level contract (governance, treasury, protocol).	Deployed by DAO or core developers; audited and governance-controlled.
	sync	***sync****-contract-xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx*	Custom contract deployed by developers or organizations.	Application-layer logic executed on AIVM; no special privileges.
Node Addresses	**synv1**	***synv1****xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx*	Class I Nodes – Consensus Nodes	Secure the chain through PoSy consensus
	synv2	***synv2****xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx*	Class II Nodes – Interoperability Nodes	Execute SXCP and UMA operations
	synv3	***synv3****xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx*	Class III Nodes – Intelligence & Computation Nodes	Provide decentralized compute and AI services
	synv4	***synv4****xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx*	Class IV Nodes – Governance & Treasury Nodes	Manage DAO proposals and treasury execution
	synv5	***synv5****xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx*	Class V Nodes – Service & Support Nodes	Operate ancillary infrastructure
Node Cluster Address	**syngrp1**	***syngrp1****xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx*	Node cluster group 1.	
	syngrp2	***syngrp2****xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx*	Node cluster group 2.	
	syngrp3	***syngrp3****xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx*	Node cluster group 3.	
	syngrp4	***syngrp4****xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx*	Node cluster group 4.	
	syngrp5	***syngrp5****xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx*	Node cluster group 5.	

Revised 12/06/2025

Synergy Network Address Formatting Specification

Category		Prefix	Example Address	Use Case / Description	Notes
DAO Governance Addresses	**DAO Proposal Address**	**syndao**	***syndao***xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx	DAO governance proposal identifier.	Created automatically for each submitted proposal.
	DAO Oversight Auditor Address	**syno**	***syno***xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx	Governance Oversight Auditor address.	Belongs to Security Council or auditing committees for compliance.
	DAO Committee Address	**syny**	***syny***xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx	DAO committee address.	Used for Treasury, Security, or Ecosystem committees.
Multisig Wallets		**synm**	***synm***xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx	General multisig wallet for shared fund control.	Enforces threshold signatures (3-of-5, 5-of-7, etc.).
		synu	***synu***xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx	DAO treasury multisig account.	Used by DAO for treasury operations or community grants.
		synl	***synl***xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx	Validator or council multisig wallet.	For emergency rollback or governance fund management.
Fee Collector		**synf**	***synf***xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx	Central address for collecting network and uDEX fees.	Automatically distributes revenue to DAO treasury and staking pools.
Network Burn Address		**syne**	**synergy00000000000000000000000burn**	Canonical unspendable burn address recognized network-wide.	Ensures permanent token destruction under deflationary model.
Reserved Prefixes / Future Use		**synr**	***synr***xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx	Reserved / Not in use.	Possible future for encrypted message routing or ephemeral key exchange.
		syni	***syni***xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx	Reserved / Not in use.	Potential internal identity registry or validator synchronization IDs.
		synp	***synp***xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx	Reserved / Not in use.	Could be utilized for privacy-enhanced transactions or permissioned subnets.

Non-Prefix Identifiers / Special Entries

Identifier Type	Format Example	Description	Notes
Synergy Naming System (SNS)	*alice**.syn***	Human-readable alias mapped to wallet or UMA address.	Registered on-chain via SNS smart contract and resolves to Synergy address.
Universal Meta-Address (UMA)	***syn:**sYnQ3d5…d1e2f**::sol:**EmTJ4FK…UTx9A*	Multi-chain identity mapping linking Synergy and external addresses.	Secured by threshold cryptography (FROST/TSS); supports key rotation and recovery.
Public Key	*6fd47f3a8dca7…….f13fd0a937a2*	Hexadecimal representation of FN-DSA-1024 public key.	Used for signature verification and transaction validation.
Private Key	*d14c8d2e5b3f7a9a0f2……..a0f1b2c3d4e5f6a*	Secret component of keypair used for signing.	Must be kept offline or encrypted; recovery via UMA/guardian rotation governance.

All addresses follow Bech32m encoding and FN-DSA-1024 quantum-safe key generation standards.
Unauthorized modification or reuse of prefixes is prohibited without DAO approval.
